

I/O Power!

Spectrum Controls unleashes the Super Heroes of I/O for Allen-Bradley PLCs.

The power of Spectrum Controls' I/O is legendary. And, now it can be yours.

For temperature sensing, our **new Universal Analog I/O** is to the rescue! In a blink of an eye, mix thermocouple, RTD, resistance, current and voltage inputs. Whether it's **CompactLogix**, **ControlLogix** or **SLC-500**—our Universal modules save the day.

Or try our **new** eight channel **Counter/Turbine Flowmeter** for **ControlLogix**. It's so accurate, you'll swear it has x-ray vision.

Plus, our **Analog+HART I/O** solution for **ControlLogix** is more powerful than a locomotive! Build the foundation of a powerful control and asset management system. Monitor device performance, life cycle and statistical data to improve efficiencies, minimize downtime and leverage predictive maintenance.

Check out Spectrum Controls' I/O super heroes at ISA Expo, October 21-23 in the HART Communications Foundation booth #1331. Or visit booth #401 at Automation Fair in Milwaukee on November 18-20.

For an I/O SOS, call 425-746-2914 or email spectrum@spectrumcontrols.com.
