

A perfect pair

**Spectrum Controls and Rockwell Automation
have partnered to bring you even more I/O.**

Spectrum Controls, the global leader in I/O for Allen-Bradley, is now available in Europe through Rockwell Automation.

Whether it's for ControlLogix, SLC 500 or PLC-5, Spectrum Controls' broad line of Allen-Bradley compatible I/O will enhance your system.

Need a high density 4- or 8-channel counter/flowmeter? Eight channels of analog I/O with channel-to-channel isolation? Or 8-channels of analog, with each channel configurable for voltage, current, RTD and/or thermocouple? Whatever the application, Spectrum Controls has the answer to your I/O needs.

Spectrum Controls strives to engineer innovative, cost-effective I/O products. An example is our new Analog I/O Modules with HART Protocol. These new modules offer direct access to both analog and HART data over ControlNet, and remote configuration, commissioning and diagnostics of HART devices. Plus, the Analog I/O Modules with HART Protocol seamlessly integrate with your ControlLogix PLC.

Spectrum Controls' Allen-Bradley compatible I/O are supported by Rockwell Automation's GMS. No matter where you are, technical support is just a phone call away.

For more information on Spectrum Controls' broad line of I/O modules, contact your local Rockwell Automation sales office today or visit www.spectrumcontrols.com.
