

HART & Soul

Finally, an asset management solution
that's music to your ears.

Spectrum Controls' new **Analog+HART** modules and **HART Gateway** software are the key to a powerful foundation for your control and asset management system.

- Move beyond hand-held communicators.
- Reduce downtime, unplanned maintenance.
- Seamlessly connect to field devices.
- Improve control process efficiency.
- Leverage plant assets.

Our **Analog+HART** modules and **HART Gateway** software, coupled with Rockwell Automation's ControlLogix integrated architecture offer a simple solution to complex control system requirements.

Make asset management a sweet sound.
