# 4-Channel Isolated Analog Input Modules

The 1746sc-INI4i and 1746sc-INI4vi Modules provide isolated analog input capability for noisy environments in individual I/O modules. The 1746sc-INI4i and 1746sc-INI4vi modules can replace analog input modules without compromising performance or price.

## Reduce System Costs

- Four, isolated, current inputs (INI4i), and four isolated current/voltage inputs (INI4vi).
- Six input ranges.
- Use any combination of input types at one time.
- Accuracy comparable with dedicated analog modules.
- Individually programmable for each channel.
- Easy to configure using ladder register settings or RSLogix programming software.
- Channel-selectable filtering for fastest analog update time and noise rejection.
- On-board ambient temperature compensation to manage fluctuating ambient temperatures in overcrowded cabinets.
