Get Your Message Across

Whether it's process alarming, safety messages, inventory data or just congratulating the team, InView delivers the right information at the right time to the right place. Choose from 6 different models, offering varying display sizes, colors, fonts, and effects.

- Preferred compatibility to Rockwell Automation controllers.

- Supports Modbus TCP/IP, EtherNet/IP & EtherNet TCP/IP.

- Fully licensed Rockwell Automation technology. Rockwell TechConnect support is included with your purchase.

- Industry tested and proven display technology with message visibility from up to 450 feet away

- Dynamic messaging, with the use of variables, for real-time information.

- Intuitive browser-based & OS independent setup–no need for separate software.

- Vastly superior viewing angle than most LCD & LED displays.

No Compromise Design

InView is engineered to ensure critical setup information is communicated quickly and with high visibilty. Easy setup and robust enclosures make InView the ultra-reliable solution you've been looking for.

Our goal is to deliver scalable, real-time information that fully integrates into your Rockwell Automation systems.

Full Color

Communicate your productivity, status, and alarm conditions on the brightest, most colorful, and efficient InView display ever engineered.

These displays are brighter and require less power than their predecessors.

Easy-to-Use Comms Module

## Supports Modbus TCP/IP, EtherNet/IP & EtherNet TCP/IP!

Protect your investment with a browser-based & OS-independent communications module. With virtually every configuration just two-clicks away, our easy-to-use setup enables you to spend less time learning and more time doing.

Configuration

Easily add, or edit, messages using one of our many built-in features to create the information you want to see.

Easy Tags functionality eliminates the need for special PLC add-on instructions.

Diagnostics

Keep your displays up and running with easy access to your system logs, status, and reports.

Maintenance

Take control of your solution with firmware updates, message import/export, and custom characters.

Network

Simple network setup enables you to easily configure a static IP or a DHCP client.
