SECURE REMOTE ACCESS

Secure remote access to your industrial controls systems.

- **Secure Remote Connectivity**
  Secure connectivity is the most important feature of any remote access solution. Using a Defense-in-Depth strategy, WebPort delivers best-in-class security.

- **Effective Alarm & Event Notifications**
  Maintain peace of mind knowing that alarm conditions will notify you if anything needs your attention.

- **Easy Data Access**
  We believe good information fuels great decisions, WebPort provides an intuitive dashboard to visualize your system data.

SPECTRUM CONTROLS

> "When price, performance, and functionality are our concerns, WebPort is our go to device for communications in industrial applications!"
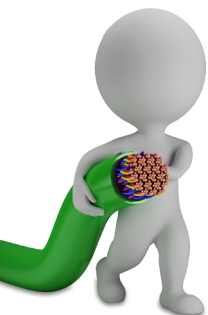

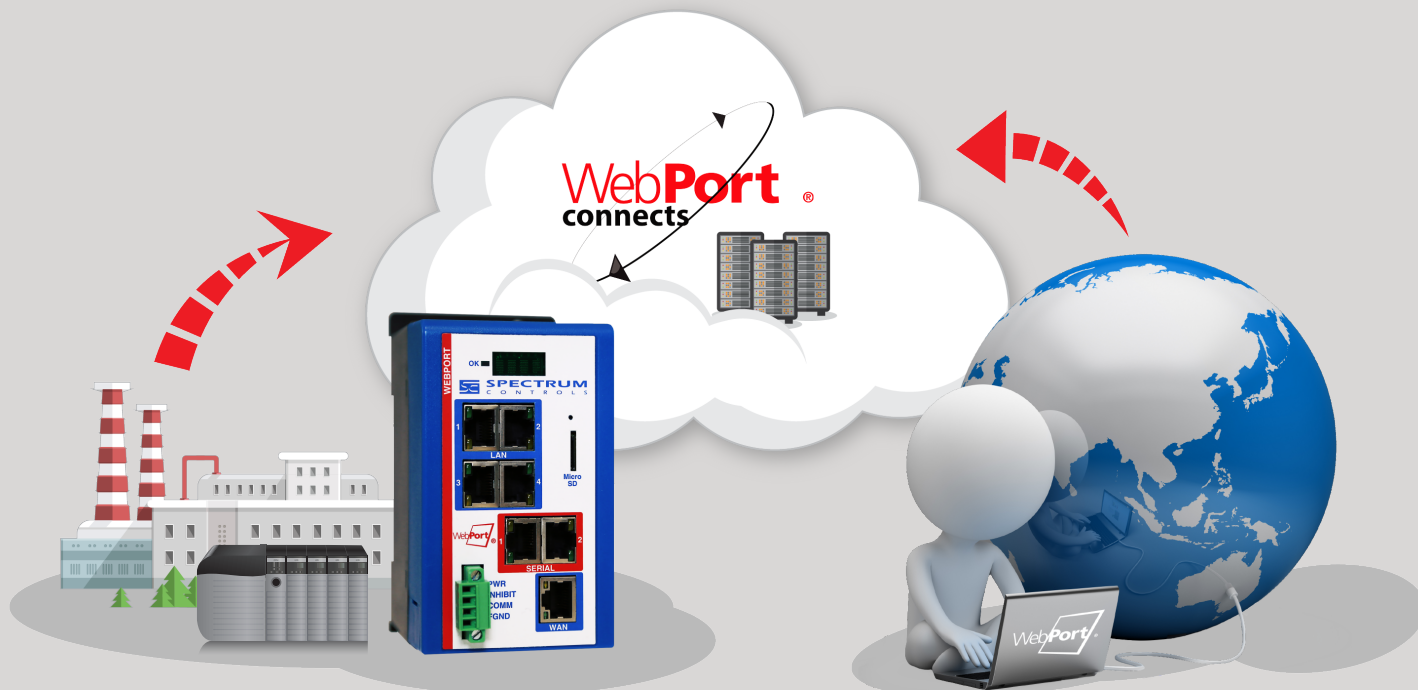

About
WebPort

With over 15 years of remote access expertise, we offer a complete IIOT solution that elegantly couples our cloud-based service with our industry-tested hardware. Pairing WebPort with WebPort Connects allows the user to take full advantage of our remote programming, diagnostics, reporting, alarming, data logging, and data visualization capabilities.

As a Rockwell Automation Global Encompass Partner and leader in IIOT technology, we strive to reduce travel and labor expenses through secure remote connectivity. Keep your best engineers working on innovation, rather than costly maintenance trips.

SPECTRUM CONTROLS

How It Works.

Setting up WebPort is quick and easy. Simply plug-in, log in and you're in!

1 Plug-in WebPort
Connect your automation systems to WebPort's serial or Ethernet ports. Available in Ethernet & 3G models.

2 Secure Outbound VPN Connection
Using an SSL request, WebPort forms a secure VPN connection to our cloud solution, WebPort Connects.

3 Access Your Systems
WebPort Connects allows you to remotely access and program your systems from any remote location.

Key Specifications

- *Class 1 Div 2/UL 508*
- *Port Forwarding*
- *White/Black list*
- *FTP/SFTP*
- *SMS*
- *SMTP/TLS email*
- *WAN to LAN gateway*
- *Cellular to LAN gateway*
- *DHCP client/server*
- *256-bit AES encryption*

SPECTRUM CONTROLS

Time and Money Saving Simplicity

Simply put, WebPort saves you time and money by maximizing your productivity and efficiency through intuitive navigation and easy access to your data.
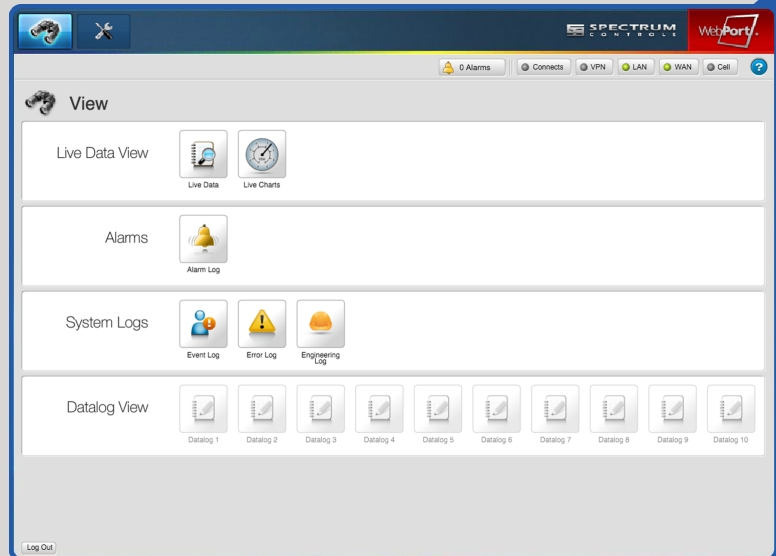

Intuitive Navigation
No need for extensive training or scripting. WebPort was designed to make configuration as intuitive as possible.

Scalable Solution
WebPort integrates into your native business tools and grows with you to meet your future needs.

Real-Time System Status
Get a jump on troubleshooting by configuring standard, analog, Boolean, or multiple operand complex alarms.

Save Time and Money

Save Travel & Labor Expenses
Remote access saves you from expensive maintenance trips.

Improve Recovery Times
Every hour you save through faster recovery is money in your pocket.

Proactive Service & Support
Create new revenue streams with proactive service and support agreements.
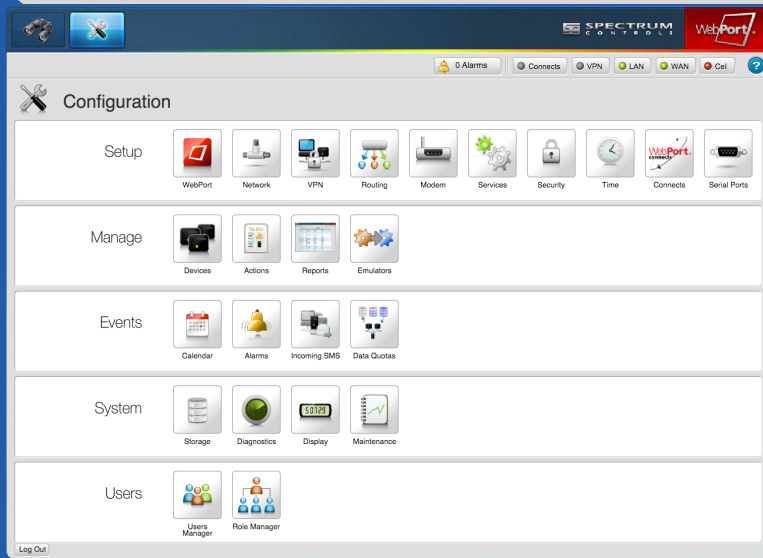

Maximize Your Data
Leverage your data for key insights to your product and labor efficiencies.

SPECTRUM CONTROLS

Secure Remote Access

Security is the central focus to the WebPort design. Through multiple layers of security, WebPort relies on a Defense-in-Depth security strategy.

Defense-in-Depth Security
A Defense-in-Depth strategy layers technical and non-technical protection to thwart unauthorized activities.
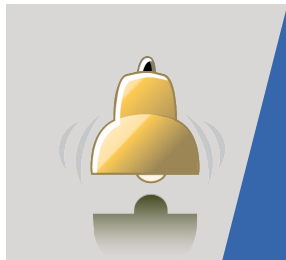

Secure Networking
Through industry-leading technology, WebPort secures your data with SSL and VPN technology.
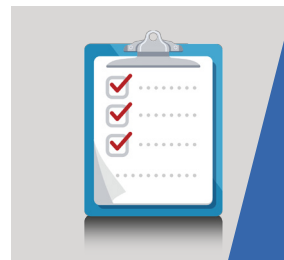

Mitigate Risk
User access controls regulate who has visibility and influence on your data.

Exclusive Features

Alarms
Set critical alarms to notify you when your attention is needed.

Actions
Set up actions to send email or SMS messages, upload to the cloud, and much more.

Reports
View and export your data in a format that talks to your business tools.

Users Manager
Manage and audit multiple users and user roles all on one device.

SPECTRUM CONTROLS

Cloud-based Solution

WebPort Connects is a turn-key VPN solution that securely centralizes and syncs your data to your business tools. Please visit webportconnects.com for more info!

Turn-key Infrastructure
Setting up a global VPN infrastructure is hard work. We've done all the heavy lifting for you.

Scalable Solution
WebPort Connects integrates with your existing business tools and scales with you as you grow.

SQL Database
Keep your data and your business tools in sync using our SQL database within WebPort Connects.

Scalable Solution

Built on the power of Microsoft's WindowsAzure™ cloud service, WebPort Connects reliably scales with you to meet your current and future needs.
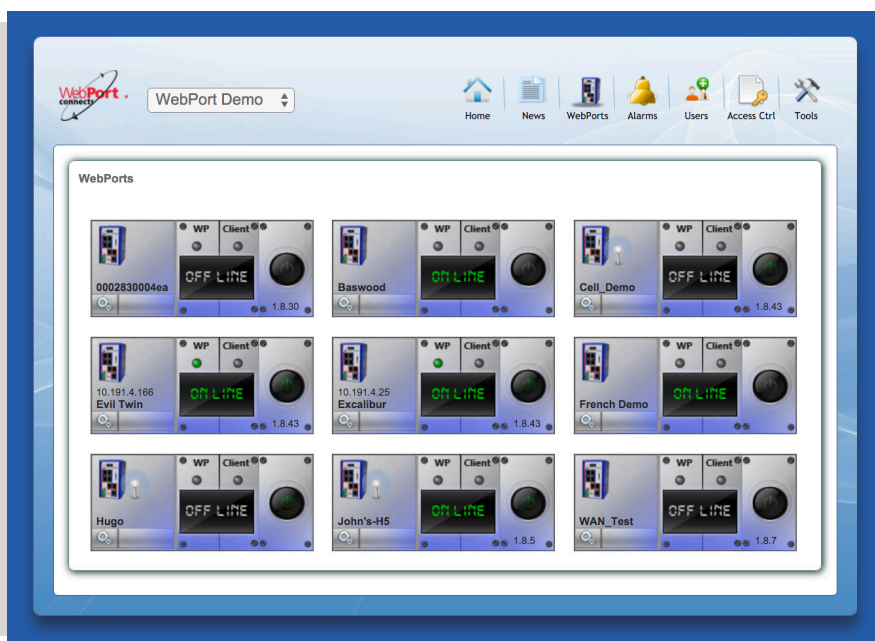

Command Center
Control all of your WebPort deployments from one centralized location.

Keep Your Data Close
WebPort Connects can provide reports to you and essential members of your team.
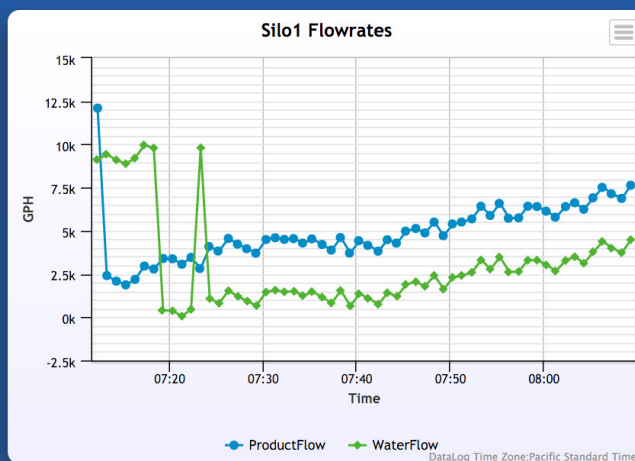

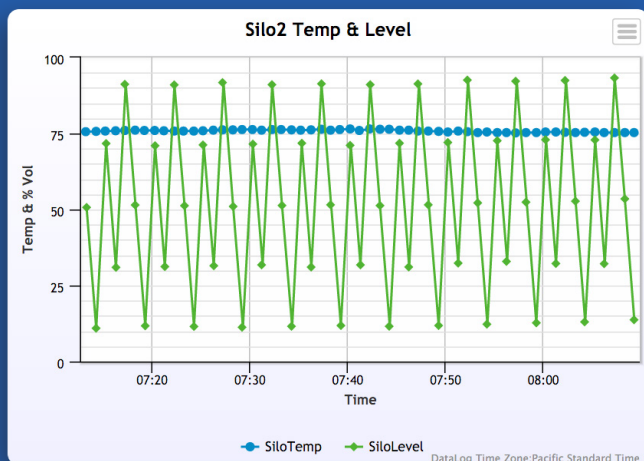

Mobile Portal
Take your data with you, wherever you go. WebPort Connects is mobile friendly.
