InView P4xR End of Life Announcement

Subject: End of Life for InView P4xR displays.

Obsolete Part Number	Discontinued Date*	Recommended Replacement Part Number
2706-P42R-SC	September 2023	2706-P42C2-SC
2706-P44R-SC	September 2022	2706-P44C2-SC

*P42R catalog number will be available for sale through the discontinued date or until inventory is depleted. The discontinued date is an estimated run out date based on current forecasts.

*P44R catalog number has been discontinued, effective immediately.

Purpose: Full-color InView displays to become the standard offering. In June 2019, Spectrum Controls released a new line of full-color, P4xC2 displays. The P4xC2 displays are NEMA 12 rated and provide the following advancements:

- Full Color – Differentiate your messages
- Increased Visibility – 2x brighter
- Lower power consumption
- Lighter weight – Over 25% lighter

Support: All warranties for existing and new product will continue in effect with no impact. Legacy P4xR catalog numbers are available for sale through the discontinued date or until inventory is depleted. Planning for migration to the P4xC2 catalog numbers is recommended and can begin immediately. The P4xC2 enclosures are a slightly smaller profile and the wall mount brackets are fixed-position.

Rockwell TechConnect will continue to provide telephone technical support for both our new and legacy displays. As is always the case, you are free to call us directly for technical support for all in depth issues. Our website, www.spectrumcontrols.com, contains full user manuals, datasheets, catalog numbers and other information for all display models.

Sincerely,

Tom Benson
Director of Product Marketing
