Universal Analog Input for Schneider Quantum™ Systems End of Life Announcement

Subject: End of Life for Spectrum Controls catalog number 140 AUI 040 00sc

End of Life Part Number	Discontinued Date*
140 AUI 040 00sc	12/31/2023

This product will be available through the discontinued date or until inventory is depleted. The discontinued date is an estimated run out date based on current consumption rate.

Due to component availability, we are announcing End of Life for our Quantum compatible Universal Analog Input Module. This module has the capability to interface with Current-Loop, Voltage, RTD and Thermocouple analog input devices. There is no direct replacement for this module. It would be possible to provide similar functionality through the use of dedicated Current-Loop, Voltage, RTD or Thermocouple input modules from Schneider's comprehensive line of Quantum™ I/O modules.

Limited stock of the 140 AUI 040 00sc remains. This stock will be sold on a first come first serve basis. When this inventory is exhausted there will be no more product available. Contingent on component parts availability, we will continue to repair existing products for the foreseeable future.

For detailed product information, our website, www.spectrumcontrols.com, contains the user manual and datasheet. You can reach our support team at support@spectrumcontrols.com for your technical support needs.

Sincerely,

Tom Benson
